## Making a difference

Welcome to Atlantic NeuroSurgical Specialists (ANS). For over 50 years, we have combined knowledge, experience, and innovative surgical techniques to provide our patients with the latest technology, treatments, and care.

Our fundamental philosophy and goal is to provide excellent neurosurgical care to our patients as well as provide a positive experience with our practice. Our highly trained and dedicated clinical staff consisting of our neurosurgeons, nurse practitioners, and experienced and competent support staff strive to provide exceptional customer service with open, direct and supportive interaction with our patients and their families.

### History of Atlantic NeuroSurgical Specialists

Established in 1958 by Henry Liss, MD and formerly known as The Neurosurgical Group of Chatham, Atlantic NeuroSurgical Specialists has devoted itself to the full spectrum of surgical treatment and management of patients with neurosurgical problems. Our comprehensive team of sub-specialized and board certified neurosurgeons is what makes ANS the premier neurosurgery practice for surgical procedures involving the brain, spine/peripheral nervous, and neurovascular systems in New Jersey. We provide access to multidisciplinary and comprehensive approaches to neurosurgical care for our patients. ANS is available to our patients 24 hours a day, 365 days a year.

### ANS Spine Specialists

While most people think neurosurgery focuses only on conditions associated with the brain, over 70% of neurosurgery procedures involve spine and spinal cord health conditions.

Neurosurgeons have the advanced training to understand the intricate relationship between the spine and the complex network of nerves that make up the spinal cord. Understanding this interrelationship between the structural aspects of the spine and the nervous system allows the neurosurgeon to fine-tune a patient's diagnosis, develop the most appropriate and least invasive treatment option, and perform complex surgeries involving the spine and spinal cord.

If you are an inpatient at one of our participating hospitals, please call your insurance carrier or our office to get complete details of your coverage. **973.285.7800.**

**Atlantic NeuroSurgical Specialists** will work with you and the carrier to ensure you have all the information about your coverage and payments you may or may not need to provide. Our main focus is getting you well and we will work with you and your insurance company to get you the best possible experience.
